Dear editor,

Thank you for the article on Feb. 22 on doctors whose specialty is working with people in pain.

There is a quote by Dr. Eric Grigsby, "In many cases, there is hope." Last year, I went to see him and he said, "I think I can help you." It was as though someone lifted a heavy burden off me.

It can be very difficult to find the cause or causes of these debilitating complaints. Some doctors get frustrated or even angry. This is why pain management is such a needed field.

Pain is a very familiar part of my life. Since going to Dr. Grigsby, there have been several times I have been released from it. It is like a miracle. Pain can stop the flow of your life, joy and pleasure.

Dr. Eric Grigsby really cares. God bless you, doctor!

Lucille Piehl
