

NOW HIRING PAIN MANAGEMENT PHYSICIANS

We're looking for world-class physicians to join our team at our Napa and Santa Rosa clinics.

Napa Pain Institute (NPI) is the premier Pain Management practice in Northern California. We are looking for Physicians to help us continue our growth as an industry-leading practice at our two Northern California locations.

Established in 1992, the Napa practice includes an integrated Ambulatory Surgery Center, and a Licensed Clinical Laboratory. NPI is also deeply involved in clinical research, and is a sponsoring partner in several national continuing medical education conferences.

Redwood Pain Institute (RPI), in partnership with St. Joseph Medical Group, is located in Santa Rosa, California. RPI opened its doors in 2017 and has quickly become established as a center of excellence offering a comprehensive range of services for patients with acute or chronic pain.

REQUIREMENTS:

- Experienced clinician (3-5 years or more)
- Excellent surgical skills/experience with implanted devices
- Available to work in Napa or Santa Rosa (we are hiring at both locations)
- Experience working with mid-level practitioners
- Commitment to a patient-centric, evidence-based approach
- Understanding of/interest in current trends in neuroscience and pain management research

RESPONSIBILITIES:

- Outpatient/Inpatient consultations and follow-up evaluations
- Coordination of Care with local Physicians and health care providers
- Pharmacologic management of pain and related conditions
- Spinal and peripheral interventional procedures and injections guided by ultrasound and fluoroscopy
- Trial procedures for implanted infusion pumps and neurostimulation
- Surgical implantation of intrathecal infusion pumps and neurostimulation systems
- Refilling, reprogramming and long term management of neuromodulation devices
- Teaching, mentoring, and supervising mid-level practitioners
- Providing hope, compassion, and sound medical advice to our patients and our community

The Napa Pain Institute:

- Sees more than 20,000 patient visits per year.
- Manages hundreds of neuromodulation devices.
- Has worked on more than 25 clinical trials in the last five years, in neuromodulation, minimally invasive spine, and pharmacologic areas.
